

# MEANWHILE,

The book called “The Meanwhile Adventures” by Roddy Doyle is very strange. Lots of stories happen at once. It’s about a man named Mister Mack who used to have a job tasting biscuits until he quit and got a new job as a mad inventor! He invents a saw that looks like a machine gun then he goes to the bank and tries to get money for it but people think it’s a machine gun so he goes to jail. Meanwhile his kids are tunneling underground to try and rescue him! Meanwhile slugs are trying to take over the world.

If you like random books you will like this one.  
I’d recommend this book to kids ages 10+.
